PUBLIC NOTICE

Sub: Advertisement is given under sub-section (2) and (3) of Section 21 of the Protection of Plant Varieties and Farmers' Rights Act, 2001 and Rules 30 and 31 of PPV & FR Rules, 2003

It is hereby advertised that the application (s) for registration of varieties listed herein have been accepted subject to the condition of fulfillment of provisions under section 19 of the Act read with Rule 29 of PPV&FR Rules, 2003. The passport data of each variety furnished by the applicant are herewith advertised as specified for calling objections from the interested persons in the matter.

The place or places where the specimen of the variety may be inspected can be obtained in writing from the Registrar of the PPV & FR Authority.

Any person may, within three months from the date of advertisement of the application(s) give notice of opposition in writing to the registration of variety (as per Form PV-3 of the First Schedule of PPV&FR Rules, 2003). Oppositions, if any, to the registration must be submitted, in triplicate, to the Registrar, PPV&FRA, NASC Complex, DPS Marg, New Delhi -110 012 accompanied with the fee of Rs.1,500/- (Rupees One Thousand and Five Hundred Only) by way of Demand Draft drawn in favour of "The Registrar, PPV & FR Authority" payable at New Delhi.

FORM O - 1
(See Rule 30)

Government of India, Plant Varieties Registry
ADVERTISEMENT OF ACCEPTED APPLICATION FOR REGISTRATION

01. Application No.

E14	OS28	07	119
------------	-------------	-----------	------------

 filed on **04/07/2007** by **Nuziveedu Seeds Private Limited, NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor, Opposite ICICI Bank Road No. 12, Banjara Hills, Hyderabad-500034, Andhra Pradesh, India** on behalf of -----NA----- for a extant (**Variety of Common Knowledge**) plant variety of crop **Rice (*Oryza sativa* L.)** having denomination **Suraj-NP 504**, the specification including its drawing and or photograph(s) of which are given below, has been accepted and given registration number -----NA----- on -----NA-----.

The convention application no. -----NA-----, in respect of the said variety has been filed on -----NA-----, in -----NA-----.

Appropriate office for the opposition of proceeding under Rule 29, of the Protection of Plant Varieties and Farmers' Rights Rules, 2003 is **Office of the Registrar, PPV & FR Authority, New Delhi – 110 012.**

Passport Data of the variety Suraj-NP 504:

Applicant : Nuziveedu Seeds Private Limited
Address of the Applicant : NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor,
Opposite ICICI Bank Road No. 12, Banjara Hills,
Hyderabad-500034, Andhra Pradesh, India
Nationality of Applicant : Indian

Application details

a. Number :

E14	OS28	07	119
------------	-------------	-----------	------------

b. Date of receipt : 04/07/2007
c. Date of acceptance : 13/07/2010

Crop (Taxonomical Lineage) : Rice (*Oryza sativa* L.)

Denomination : Suraj-NP 504

Type of Variety : Extant (Variety of Common Knowledge)

Classification of Variety : Typical

Previously proposed denomination : Not applicable

Name of Parental Material : PRN 25 x PRN 50

Name of Reference Varieties : Birsa Dhan 201 and Jaldidhan

Variety Description:

A. Group Characteristics	Remarks, measured values, example varieties, etc.
Basal leaf sheath colour	Green [Rasi, Heera]
Time of heading (50 % of plants with panicles)	Very early [Heera]
Stem: Length (Excluding panicles; excluding floating rice)	Short [PR 106, Vajram]
Decorticated grain: Length	Long [Ratna, Triguna]
Decorticated grain: Shape	Long slender [Krishna Hamsa]
Decorticated grain: Colour	White [Sugandhamati]
Endosperm: Content of amylose	----
Decorticated grain: Aroma	Absent [Jaya]
B. Distinct Characteristics:	
<p>Suraj-NP 504 has distinguishing characters like well exerted panicles, long slender decorticated grain shape, thin stem thickness, short stem length, very early time of maturity and white decorticated grain colour.</p>	

C. Reference varieties:
<p>1. Birsa Dhan 201: It has distinguishing characters like well exerted panicles, long bold</p>

decorticated grain shape, thin stem thickness, short stem length, very early time of maturity and white decorticated grain colour.

2. Jaldidhan: It has distinguishing characters like well exerted panicles, long bold decorticated grain shape, medium stem thickness, short stem length, very early time of maturity and white decorticated grain colour.

D. Date of commercialization of the variety	Commercialized since 02/09/2004
--	---------------------------------

E. Photographs: (See figure 01a and b)

02. Application No.

E17	OS31	07	122
------------	-------------	-----------	------------

 filed on **05/07/2007** by **Nuziveedu Seeds Private Limited, NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor, Opposite ICICI Bank Road No. 12, Banjara Hills, Hyderabad-500034, Andhra Pradesh, India** on behalf of -----NA----- for a extant (**Variety of Common Knowledge**) plant variety of crop **Rice** (*Oryza sativa* L.) having denomination **Sourabh-NP 950**, the specification including its drawing and or photograph(s) of which are given below, has been accepted and given registration number -----NA----- on -----NA-----.

The convention application no. -----NA-----, in respect of the said variety has been filed on -----NA-----, in -----NA-----.

Appropriate office for the opposition of proceeding under Rule 29, of the Protection of Plant Varieties and Farmers' Rights Rules, 2003 is **Office of the Registrar, PPV & FR Authority, New Delhi – 110 012.**

Passport Data of the variety Sourabh-NP 950:

Applicant : Nuziveedu Seeds Private Limited
Address of the Applicant : NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor,
Opposite ICICI Bank Road No. 12, Banjara Hills,
Hyderabad-500034, Andhra Pradesh, India
Nationality of Applicant : Indian

Application details

a. Number	:	<table border="1"> <tr> <td>E17</td> <td>OS31</td> <td>07</td> <td>122</td> </tr> </table>	E17	OS31	07	122
E17	OS31	07	122			
b. Date of receipt	:	05/07/2007				
c. Date of acceptance	:	13/07/2010				
Crop (Taxonomical Lineage)	:	Rice (<i>Oryza sativa</i> L.)				
Denomination	:	Sourabh-NP 950				
Type of Variety	:	Extant (Variety of Common Knowledge)				
Classification of Variety	:	Typical				
Previously proposed denomination	:	Not applicable				
Name of Parental Material	:	PAB 950 x PRN 01-9				
Name of Reference Varieties	:	Ajaya and Narendra 359				

Variety Description:

A. Group Characteristics	Remarks, measured values, example varieties, etc.
Basal leaf sheath colour	Green [Rasi, Heera]
Time of heading (50 % of plants with panicles)	Early [Rasi, Ravi]
Stem: Length (Excluding panicles; excluding floating rice)	Short [PR 106, Vajram]
Decorticated grain: Length	Long [Ratna, Triguna]
Decorticated grain: Shape	Long slender [Krishna Hamsa]
Decorticated grain: Colour	White [Sugandhamati]
Endosperm: Content of amylose	Medium [Taroari Basmati]
Decorticated grain: Aroma	Absent [Jaya]

B. Distinct Characteristics:

Sourabh-NP 950 has distinguishing characters like green basal leaf sheath colour, presence of leaf auricles, absence of anthocyanin colouration of leaf auricles, split shape of ligule, white colour of ligule, early time of heading, erect attitude of blade (early and late observation), weak density of pubescence of lemma, absence of anthocyanin colouration of apex of lemma, white colour of stigma, short stem length, absence of anthocyanin colouration of nodes, medium length of main axis of panicle, semi-straight curvature of main axis of panicle, white colour of tip of lemma, absence of awns, yellowish white colour of awns (late observation), erect to semi erect attitude of panicle branches, well exerted panicles, straw colour of sterile lemma, long decorticated grain length, medium decorticated grain width, long slender decorticated grain shape, white decorticated grain colour, presence of medium content of endosperm amylose and absence of decorticated grain aroma.

C. Reference varieties:

1. Ajaya: It has distinguishing characters like green basal leaf sheath colour, presence of leaf auricles, absence of anthocyanin colouration of leaf auricles, split shape of ligule, white colour of ligule, medium time of heading, semi-erect attitude of blade (early and late observation), weak density of pubescence of lemma, absence of anthocyanin colouration of apex of lemma, white colour of stigma, short stem length, absence of anthocyanin colouration of nodes, short length of main axis of panicle, semi-straight curvature of main axis of panicle, white colour of tip of lemma, absence of awns, yellowish white colour of awns (late observation), erect to semi erect attitude of panicle branches, well exerted panicles, straw colour of sterile lemma, long decorticated grain length, medium decorticated grain width, long bold decorticated grain shape, white decorticated grain colour, presence of medium content of endosperm amylose and absence of decorticated grain aroma.

2. Narendra 359: It has distinguishing characters like green basal leaf sheath colour, absence of leaf auricles, absence of anthocyanin colouration of leaf auricles, truncated shape of ligule, white colour of ligule, medium time of heading, semi-erect attitude of blade (early and late observation), weak density of pubescence of lemma, absence of anthocyanin colouration of apex of lemma, white colour of stigma, short stem length, absence of anthocyanin colouration

of nodes, medium length of main axis of panicle, semi-straight curvature of main axis of panicle, white colour of tip of lemma, absence of awns, yellowish white colour of awns (late observation), erect to semi erect attitude of panicle branches, well exerted panicles, straw colour of sterile lemma, medium decorticated grain length, broad decorticated grain width, long bold decorticated grain shape, white decorticated grain colour, presence of medium content of endosperm amylose and absence of decorticated grain aroma.

D. Date of commercialization of the variety	Commercialized since 03/05/2001.
--	----------------------------------

E. Photographs: (See figure 02a and b)

03. Application No.

E33	ZM56	09	473
------------	-------------	-----------	------------

 filed on **03/11/2009** by **Nuziveedu Seeds Private Limited, NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor, Opposite ICICI Bank Road No. 12, Banjara Hills, Hyderabad-500034, Andhra Pradesh, India** on behalf of -----NA----- for a **extant (Variety of Common Knowledge) plant variety** of crop **Maize** [*Zea mays* L.] having denomination **NM-74B**, the specification includes its drawing and or photograph(s) of which are given below, has been accepted and given registration number ----NA-----on -----NA-----.

The convention application no. -----NA-----, in respect of the said variety has been filed on -----NA-----, in ---NA-----.

Appropriate office for the opposition of proceeding under Rule 29, of the Protection of Plant Varieties and Farmers' Rights Rules,2003 is **Office of the Registrar, PPV & FR Authority, New Delhi – 110 012.**

Passport data of the variety NM-74B:

Applicant : Nuziveedu Seeds Private Limited
Address of the Applicant : NSL ICON, No. 8-2-684/2/A, Plot No. 1 to 4, 4th Floor,
Opposite ICICI Bank Road No. 12, Banjara Hills,
Hyderabad-500034, Andhra Pradesh, India
Nationality of Applicant : Indian

Application details

a. Number :

E33	ZM56	09	473
-----	------	----	-----

b. Date of receipt : 03/11/2009

c. Date of acceptance : 13/07/2010

Crop (Taxonomical Lineage) : Maize (*Zea mays* L.)

Denomination : NM-74B

Type of Variety : Extant (Variety of Common Knowledge)

Classification of Variety : Inbred parent

Previously proposed

Denomination : Not applicable

Name of Parental Material : Selfing and selection from Population 35

Name of Reference Varieties : COH (M) 4 and COH 3

Variety Description:

A. Group Characteristics	Remarks measured values, example varieties, etc.
Tassel: Time of anthesis (on middle third of main axis, 50% of plants)	Early [HKI 1025]
Ear: Time of silk emergence (50% plants)	Early [HKI 1025]
Ear: Anthocyanin colouration of silks	Present [HKI 323]
Plant: Length	Medium [HKI 323]
Ear: Type of grain	Flint [HKI 1105]

B. Distinct Characteristics:

NM-74B has distinguishing characters like drooping attitude of blade, early time of anthesis, early time of silk emergence, presence of anthocyanin colouration of silks, medium plant length, broad width of blade, medium ear length without husk, flint type of grain and straight kernel row arrangement.

C. Reference varieties:

1. CM 146: It has distinguishing characters like drooping attitude of blade, late time of anthesis, late time of silk emergence, presence of anthocyanin colouration of silks, medium plant length, medium width of blade, medium ear length without husk, flint type of grain and straight kernel

row arrangement.

2. CI 4: It has distinguishing characters like straight attitude of blade, late time of anthesis, late time of silk emergence, presence of anthocyanin colouration of silks, medium plant length, medium width of blade, medium ear length without husk, semi-flint type of grain and straight kernel row arrangement.

D. Date of commercialization of the variety	Exploited for developing Maize hybrid NMH-589 commercialized since 2001.
--	--

E. Photographs: (See figure 03a, b and c)

Application details

a. Number :

E34	ZM57	09	474
-----	------	----	-----

b. Date of receipt : 03/11/2009

c. Date of acceptance : 13/07/2010

Crop (Taxonomical Lineage) : Maize (*Zea mays* L.)

Denomination : NM-74A

Type of Variety : Extant (Variety of Common Knowledge)

Classification of Variety : Inbred parent

Previously proposed denomination : Not applicable

Name of Parental Material : Selfing and selection from Population 34

Name of Reference Varieties : CM 146 and CI 4

Variety Description:

A. Group Characteristics	Remarks measured values, example varieties, etc.
Tassel: Time of anthesis (on middle third of main axis, 50% of plants)	Early [HKI 1025]
Ear: Time of silk emergence (50% plants)	Early [HKI 1025]
Ear: Anthocyanin colouration of silks	Absent [HKI 1025]
Plant: Length	Long [HKI 1128]
Ear: Type of grain	Flint [HKI 1105]

B. Distinct Characteristics:

NM-74A has distinguishing characters like drooping attitude of blade, early time of anthesis, early time of silk emergence, absence of anthocyanin colouration of silks, long plant length, broad width of blade, medium ear length without husk, flint type of grain and straight kernel row arrangement.

C. Reference varieties:

- 1. CM 146:** It has distinguishing characters like drooping attitude of blade, late time of anthesis, late time of silk emergence, presence of anthocyanin colouration of silks, medium plant length, medium width of blade, medium ear length without husk, flint type of grain and straight kernel row arrangement.
- 2. CI 4:** It has distinguishing characters like straight attitude of blade, late time of anthesis, late

time of silk emergence, presence of anthocyanin colouration of silks, medium plant length, medium width of blade, medium ear length without husk, semi-flint type of grain and straight kernel row arrangement.

D. Date of commercialization of the variety	Exploited for developing Maize hybrid NMH-589 commercialized since 2001.

PUBLIC NOTICE

Sub: Advertisement is given under sub-section (2) of Section 21 of PPV&FR Act, 2001 for registration of extant variety [Section 2(j)(i) of the Act] read with Rules 30 and 31 of PPV & FR Rules, 2003.

It is hereby advertised that on the recommendations of the Extant Variety Recommendation Committee duly constituted by the Authority under Regulation 6 of PPV & FR Regulations, 2006 the following application(s) for extant variety [notified under Seeds Act, 1966] have been accepted by the Registrar, Protection of Plant Varieties & Farmers' Rights Authority. The passport data of each variety as furnished by the applicant are advertised herewith calling for objections from interested persons in the matter.

Any person may, within three months from the date of advertisement of the application(s) give notice of opposition in writing to the registration of variety (as per Form PV-3 of the First Schedule of PPV&FR Rules, 2003). Oppositions, if any, to the registration must be submitted, in triplicate, to the Registrar, PPV&FRA, NASC Complex, DPS Marg, New Delhi -110 012 accompanied with the fee of Rs.1,500/- (Rupees One Thousand and Five Hundred Only) by way of Demand Draft drawn in favour of "The Registrar, PPV & FR Authority" payable at New Delhi.

FORM O - 1
(See Rule 30)
Government of India, Plant Varieties Registry
Advertisement of accepted application for registration

01. Application No.

E59	OS78	07	381
-----	------	----	-----

 filed on **06/12/2007** by **Indian Council of Agricultural Research (ICAR), Krishi Bhawan, Dr. Rajendra Prasad Road, New Delhi-110 001, India** for a extant plant variety notified under the Seed Act, 1966 of crop **Rice** (*Oryza sativa* L.) having denomination **PTB-51 (AATHIRA)** the specification including its drawing and or photograph(s) of which are given below has been accepted and given registration number -----NA----- on -----NA-----.

The convention application No. -----NA-----, in respect of the said variety has been filed on -----NA-----, in ---NA-----.

Appropriate office for the opposition of proceeding under Rule 29, of the Protection of Plant Varieties and Farmers' Rights Rules, 2003 is **Office of the Registrar, PPV & FR Authority, New Delhi – 110 012.**

Passport data of the variety PTB-51 (AATHIRA):

Crop (Taxonomical Lineage) : Rice (*Oryza sativa* L.)
Denomination : PTB-51 (AATHIRA)
Classification of Variety : Typical
Notification Details : Number: 599 (E)
Dated: 25/04/2006
Denomination: PTB-51 (AATHIRA)

Variety Description

Distinct Characteristics:

PTB-51 (AATHIRA) has distinguishing characters like medium leaf pubescence of blade surface, late time of heading, weak spikelet density of pubescence of lemma, absence of lemma anthocyanin colouration of apex, white spikelet colour of stigma, very short stem length, semi erect flag leaf attitude of blade, semi straight panicle curvature of main axis, yellowish spikelet colour of tip of lemma, semi erect to spreading panicle attitude of branches, mostly exerted

panicle exertion, straw sterile lemma colour, medium decorticated grain, medium decorticated grain width, short bold decorticated grain shape and medium endosperm content of amylase.

Date of commercialization of the variety

PTB-51 (AATHIRA) has been commercialized since 2006.

Photographs: (See Figure 01)

02. Application No.

E37	ZM6	08	45
-----	-----	----	----

 filed on **02/01/2008** by **Indian Council of Agricultural Research (ICAR), Krishi Bhawan, Dr. Rajendra Prasad Road, New Delhi-110 001, India** for a extant plant variety notified under the Seed Act, 1966 of crop **Maize** (*Zea mays* L.) having denomination **Dewaki Composite** the specification including its drawing and or photograph(s) of which are given below has been accepted and given registration number -----NA----- on -----NA-----.

The convention application No. -----NA-----, in respect of the said variety has been filed on -----NA-----, in ---NA-----.

Appropriate office for the opposition of proceeding under Rule 29, of the Protection of Plant Varieties and Farmers' Rights Rules, 2003 is **Office of the Registrar, PPV & FR Authority, New Delhi – 110 012.**

Passport data of the variety Dewaki Composite:

Crop (Taxonomical Lineage) : Maize (*Zea mays* L.)
Denomination : Dewaki Composite
Classification of Variety : Typical
Notification Details : Number: 01 (E)
Dated: 01/01/1996
Denomination: Dewaki Composite

Variety Description

Distinct Characteristics:

Dewaki Composite has distinguishing characters like absence of anthocyanin colouration of glumes excluding base, absence of anthocyanin colouration of anthers, long length of main axis above lowest side branch of tassel, long plant length, medium width of leaf blade, long ear length

without husk, large ear diameter, cylindrical ear shape, many number of rows of grains, white colour of top of grain, shrunken kernel shape and large weight of 100 kernel.

Date of commercialization of the variety

Dewaki Composite has been commercialized since 1996.
