Preface

Agriculture provides for employment and the key means of livelihood for a majority of India's population. More significantly, about 65 per cent of the total farming population in the country constitutes small and marginal farmers. A balanced approach towards protecting the interests of the plant breeders and the traditional farming communities was needed. Keeping in view the national requirement and international obligation under Article 27(3) (b) of TRIPS Agreement, India adopted a *sui genesis* system for plant variety protection system and Government of India enacted the "Protection of Plant Varieties and Farmer's Rights (PPV&FR) Act, 2001". The Act is the first of its kind in granting intellectual property rights not only to plant breeders but also to the farmers by protecting new, extant and farmers' varieties. It emphasizes farmers' Rights as positive rights capturing the spirit of FAO International Treaty on Plant Genetic Resources for Food and Agriculture and UN Convention on Biological Diversity. The PPV&FR Rules were notified on 12 September, 2003 and the PPV&FR Regulations notified on 7th December, 2006. The major objectives of the Act include providing an effective system for protection of plant varieties and rights of farmers and plant breeders, recognizing and protecting the rights of farmers in respect of their contribution made at any time in conserving, improving and making available plant genetic resources for the development of new plant varieties, contributing to accelerate the agricultural development in the country, stimulate investment for research and development in public/private sector for development of plant variety; and facilitating the growth of seed industry. For implementing the various provisions of the Act, the Central Government established the "Protection of Plant Varieties and Farmers' Rights Authority" on 11 November 2005 with its office at New Delhi. To facilitate the registration of plant varieties, Authority has opened five branch offices of the Plant Varieties Registry and Authority, at Birsa Agricultural University, Ranchi; Assam Agricultural University, Guwahati; University of Agricultural Sciences, Shivamogga; Mahatma Phule Krishi Vishwavidyalaya, Pune; and Chaudhary Sarwan Kumar Himachal Pradesh Krishi Vishwavidyalaya, Palampur.

Under PPV&FR Act, 2001, New, Essentially Derived Varieties (EDV), Extant Varieties notified under the Seeds Act, 1966; Extant variety about which there is common knowledge (VCK) and Farmers' varieties can be registered. The varieties for registration must fulfil the criteria of Distinctiveness, Uniformity and Stability (DUS) and should also have a single and distinct denomination. The major steps in registration of plant varieties under the Act include filing of application, examination of application and conduct of suitable DUS test, evaluation of DUS test results, publication of passport data in the Plant Variety Journal of India (PVJI) for inviting objections, if any, within a specified time frame and issuance of registration certificate to the applicant/breeder. The certificate of registration shall be valid initially for nine years in case of tree and vines and six years for other crops and may be renewed for remaining period of protection on payment of prescribed fee. The total period of validity of certificate of registration shall not exceed 18 years in case of trees and vines and 15 years in case of other crops from the date of registration of the variety.

At present the PPV&FR Authority has notified 165 crop species and has opened the registration for these crops. The office of the registry initiated the registration process and started receiving applications for registration and protection of eligible varieties of notified genera and species of the crops from 21 May 2007. Till November 30, 2021, a total of 17629

applications have been received for registration. It includes 2621 applications filed under new category, 3394 applications filed under extant category, 11113 farmers' variety applications and 152 applications for essentially derived variety have been filed for registration under the Act. Analysis of the data indicates that 4276 applications have been filed for registration by the private seed companies (including both Indian and multinationals) and 2218 applications were received from the public institutions and State Agricultural Universities and 03 applications were received from the individual breeder. A total of 11124 farmers' variety applications have been received from farmers' communities across India. The Authority has established 148 DUS test centres for different crop species which are responsible to conduct DUS test of varieties applied for registration and to maintain, multiply and characterize reference/ example varieties as per DUS descriptors. The Authority has established the National Gene Bank to hold the orthodox or true seeds of the registered varieties. It also acts as repository of the seed or propagules during the process of registration and provides the true reference sample of the registered varieties for any future use. For tree/vines/ other vegetatively propagated crop species, four Field Gene Banks have been established at Dapoli (Maharashtra) for Tropical and sub-tropical crops, Ranchi (Jharkhand) for Eastern ecosystem, Mashobra (Himachal Pradesh) for temperate fruit crops and CAZRI, Jodhpur (Rajasthan) for Arid crops.

Up to November 30, 2021, a total of 4753 registration certificates were issued for varieties of notified crop species. Of these, 1483 registration certificates were issued to public research organisations/SAUs, 1376 to private seed companies and 1894 to individual farmer/farming community. The issuance of registration certificates started in 2009 and by the end of November 2021, a total of 4753 certificates were issued under different categories.

The present compilation is a list of varieties registered by PPV&FR Authority upto November 30, 2021 under various categories. The compilation has included the registration number, crop name, denomination, type of variety (new, extant, farmers'), applicants' name & address, category (private, public, farmer), date of certificate of registration and specific characters. PPV&FRA shall continue to update this publication on regular basis.

Acknowledgement

The publication of compendium of registered farmers' varieties is one of the important statutory functions of the Act. It documents and protects the traditional varieties more particularly our farmers' varieties from misappropriation and infringement and prevents bio-piracy. Registration of farmers varieties are an important indicator of agricultural development of this country. It is needless to say that farmers' varieties are registered only under the Indian law and no other law anywhere in the world provides for the same. This protection is implemented only by such publication of compendium of registered varieties.

At the outset I thank Dr. K.V. Prabhu our Chairperson whose technical guidance and support has enabled us to come out with this publication. I also thank Sh. Vipin Tyagi, Financial Advisor, Sh. Dipal Roy Choudhury, Joint Registrar, Sh. Raj Ganesh, D.S. Legal Advisor, Sh. U.K. Dubey, Deputy Registrar and Sh. R.S. Sengar, Deputy Registrar, whose support and facilitation were important in timely publication of this book.

Introduction

In order to provide for the establishment of an effective system for the protection of plant varieties, the rights of farmers and plant breeders and to encourage the development of new varieties of plants it has been considered necessary to recognize and to protect the rights of the farmers in respect of their contributions made at any time in conserving, improving and making available plant genetic resources for the development of new plant varieties. The Govt. of India enacted “The Protection of Plant Varieties and Farmers’ Rights (PPV&FR) Act, 2001” adopting sui generis system. Indian legislation is not only in conformity with International Union for the Protection of New Varieties of Plants (UPOV), 1978, but also have sufficient provisions to protect the interests of public sector breeding institutions and the farmers. The legislation recognizes the contributions of both commercial plant breeders and farmers in plant breeding activity and also provides to implement TRIPs in a way that supports the specific socio-economic interests of all the stakeholders including private, public sectors and research institutions, as well as resource-constrained farmers.

To implement the provisions of the Act the Department of Agriculture, Cooperation and Farmers Welfare, Ministry of Agriculture and Farmers Welfare established the Protection of Plant Varieties and Farmers’ Rights Authority on 11th November, 2005. The Chairperson is the Chief Executive of the Authority. Besides the Chairperson, the Authority has 15 members, as notified by the Government of India (GOI). Eight of them are ex-officio members representing various Departments/ Ministries, three from SAUs and the State Governments, one representative each for farmers, tribal organization, seed industry and women organization associated with agricultural activities are nominated by the Central Government. The Registrar General is the ex-officio Member Secretary of the Authority.

Objectives of the PPV & FR Act, 2001

1. To establish an effective system for the protection of plant varieties, the rights of farmers and plant breeders and to encourage the development of new varieties of plants.
2. To recognize and protect the rights of farmers in respect of their contributions made at any time in conserving, improving and making available plant genetic resources for the development of new plant varieties.
3. To accelerate agricultural development in the country, protect plant breeders’ rights; stimulate investment for research and development both in public & private sector for the development new of plant varieties.
4. Facilitate the growth of seed industry in the country which will ensure the availability of high quality seeds and planting material to the farmers.

General Functions of the Authority

- Registration of new plant varieties, essentially derived varieties (EDV), extant varieties; Developing DUS (Distinctiveness, Uniformity and Stability) test guidelines for new plant species;
- Developing characterization and documentation of varieties registered;

- Compulsory cataloging facilities for all variety of plants;
- Documentation, indexing and cataloguing of farmers' varieties;
- Recognizing and rewarding farmers, community of farmers, particularly;
- tribal and rural community engaged in conservation and improvement;
- Preservation of plant genetic resources of economic plants and their wild relatives;
- Maintenance of the National Register of Plant Varieties and
- Maintenance of National Gene Bank.

Rights under the Act

Breeders' Rights

Breeders will have exclusive rights to produce, sell, market, distribute, import or export the protected variety. Breeder can appoint agent/ licensee and may exercise for civil remedy in case of infringement of rights.

Researchers' Rights

Researcher can use any of the registered variety under the Act for conducting experiment or research. This includes the use of a variety as an initial source of variety for the purpose of developing another variety but repeated use needs prior permission of the registered breeder.

Farmers' Rights

- A farmer who has evolved or developed a new variety is entitled for registration and protection in like manner as a breeder of a variety;
- Farmers variety can also be registered as an extant variety;
- A farmer can save, use, sow, re-sow, exchange, share or sell his farm produce including seed of a variety protected under the PPV&FR Act, 2001 in the same manner as he was entitled before the coming into force of this Act provided farmer shall not be entitled to sell branded seed of a variety protected under the PPV&FR Act, 2001;
- Farmers are eligible for recognition and rewards for the conservation of Plant Genetic Resources of land races and wild relatives of economic plants;
- There is also a provision for compensation to the farmers for non-performance of variety under Section 39 (2) of the Act, 2001 and
- Farmer shall not be liable to pay any fee in any proceeding before the Authority or Registrar or the Tribunal or the High Court under the Act.

Registration

A variety is eligible for registration under the Act if it essentially fulfills the criteria of Distinctiveness, Uniformity and Stability (DUS). The Central Government issues notification in official Gazettes specifying the genera and species for the purpose of registration of varieties. So far, the Central Government has notified 165 crop species for the purpose of registration (list available on the website of the Authority ie. www.plantauthority.gov.in). The PPV&FR Authority has developed "Guidelines for the Conduct of Species Specific Distinctiveness, Uniformity and Stability," tests or "Specific Guidelines", for individual crop species. The time limit for registration of extant varieties is available on the official website of the authority.

Fees for registration

Application for registration of plant varieties should be accompanied with the fee of registration prescribed by the Authority. Fee for registration for different types of variety is as under:

S. No.	Type of Variety	Fee for Registration
1.	Extant Variety notified under section 5 of the Seeds Act, 1966	Rs. 2000/-
2.	New Variety/Essentially Derived Variety(EDV)/ Extant Variety about which there is common knowledge (VCK)	Individual Rs. 7000/- Educational Rs.10000/- Commercial Rs.50000/-
3.	Farmer varieties	NO FEE

The Registration of a variety is renewable subject to payment of annual and renewal fee as notified in the Plant Variety Journal of India of the Authority and Gazette of India dated 15.06.2015.

DUS Test Centers

Authority has notified DUS test Centers for different crops with a mandate for maintaining and multiplication of reference collection, example varieties and generation of database for DUS descriptors as per DUS guidelines of respective crops. The list of DUS test Centers is available on the official website of the Authority ie. www.plantauthority.gov.in.

Plant Variety Journal of India

Authority publishes its official journal “Plant Varieties Journal of India” (PVJI) as a monthly bilingual (Hindi & English) publication and made available to public on the first working day of each month on its official website. This journal has the equivalent status of a gazette under the Regulations, 2006. The contents of Journal includes official and public notices, passport data of plant varieties, DUS test guidelines of crop species, details of certificate of registration and other related matters.

Certificate of Registration

Applications which have fulfilled all requirements and have been finally accepted by the Registrar for Registration. Total 4753 Certificates have been issued, out of which 868 have been issued for new varieties, 637 for extant (VCK), 1341 for extant varieties notified under the Seeds Act, 1966, 1893 for farmers’ varieties and 14 for Essentially Derived Variety(EDV). The certificate of registration issued will be valid for nine years in case of trees and vines and six years in case of other crops. It may be reviewed and renewed for the remaining period on payment of renewal fees subject to the condition that total period of validity shall not exceed eighteen years in case of trees and vines from the date of registration of the variety, fifteen years from the date of notification of variety under the Seeds Act, 1966 and in other cases fifteen years from the date of registration of the variety. Authority has received 17629 applications as on November 30, 2021, for registration for different categories of varieties including farmer’s varieties.

National Register of Plant Varieties

National Register of Plant Varieties has been kept at the head office of the Registry, containing the names of all the registered plant varieties with the names and addresses of their respective breeders, the rights of such breeders in respect of the registered varieties, the particulars of the denomination of each registered variety, its seed or other propagating material along with specification of salient features thereof and such other matters as may be prescribed.

National Gene Bank

Authority has established National Gene Bank to store the seed material including parental lines submitted by the breeders of the registered varieties. The seed lot is stored under low temperature conditions at 50 C for the entire registration period, and if necessary after few years of storage in the National Gene Bank, the seed lot will be rejuvenated and replenished at the cost of the applicant. The seed stored in the National Gene Bank will be used for dispute settlement or when an exigency arises for invoking compulsory licensing provision. Such a seed deposition in the National Gene Bank would dissuade market malpractices or violations as the sample in custody can be drawn to verify the facts. When the period of registration granted lapses, the material automatically moves to public domain.

National Gene Fund

A National Gene Fund has been established by the Authority to receive the contributions from:

- the benefit sharing received in the prescribed manner from the breeder of a variety or an essentially derived variety registered under the Act, or the propagating material of such variety or essentially derived variety, as the case may be;
- the annual fee payable to the Authority by way of royalty;
- the compensation deposited by breeders and
- the contribution from any National and International organizations and other sources.

The Gene Fund shall be utilized for:-

- any amount to be paid by way of benefit sharing,
- the compensation payable to the farmer/community of farmers',
- the expenditure for supporting the conservation and sustainable use of genetic resources including in-situ and ex-situ collections and for strengthening the capability of the panchayat in carrying out such conservation and sustainable use,
- the expenditure of the schemes relating to benefit sharing.

Benefit Sharing

- The benefit sharing is one of the most important ingredients of the farmers' rights. Section 26 provides benefits sharing and the claims can be submitted by the citizens of India or firms or non-governmental organization (NGOs) formed or established in India. Depending upon the extent and nature of the use of genetic material of the claimant in the development of the variety along with commercial utility and demand in the market of the variety breeder will deposit the amount in the Gene Fund. The amount deposited

will be paid to the claimant from National Gene Fund. The Authority also publishes the contents of the certificate in the PVJI for the purpose of inviting claims for benefits sharing.

Rights of Community

- It is compensation to village or local communities for their significant contribution in the evolution of variety which has been registered under the Act.
- Any person/group of persons/governmental or non-governmental organization, on behalf of any village/local community in India, can file in any notified centre, claim for contribution in the evolution of any variety.

Convention countries

- Convention country means a country which has acceded to an international convention for the protection of plant varieties to which India has also acceded or a country which has law of protection of plant varieties on the basis of which India has entered into an agreements for granting plant breeders' rights to the citizen of both the countries. Any person if applies for the registration of a variety in India within twelve months after the date on which the application was made in the convention country, such variety shall, if registered under this Act, be registered as of the date on which the application was made in convention country and that date shall be deemed for the purpose of this Act to be the date of registration.

Process of Registration of Farmers varieties

The application for registration of Farmers' Variety as defined under Section 2(I), to be registered shall henceforth be accepted only after pure seed is produced and a verification certificate is issued as provided in the Section 18 (1) (h) of the Act, by (Annexure I) by Competent Authority of the State Agricultural University or Central Agricultural University, ICAR or CSIR or Central Government/ State Government/ UT Institutions relevant to the crop species in case there is no SAU in the State, Under whose regional jurisdiction the farmer/community belongs in respect of the variety's status as,

- a) Either a traditional variety or selection in a traditional variety or land race (land race itself shall be only under community ownership claim and not in individual farmers name) or selection in a landrace; and
- b) Genetically pure, uniform and stable as ascertained by a plant breeder assigned for the purpose by the Competent Authority of the institution approached by the farmer given that ,
 - i) The verification of the above parameters may be taken up either at the institution concerned or the farmers' field, expenditure for which shall be met by the Authority (without provision of any staff for the project) if needed.
 - ii) Crop Expert/Botanist as required shall be made available on the request of the institution, but only in the event such an expertise does not exist in the institution (this is in public interest and cannot be undermined on the grounds of lack of time availability of the expert).

An intimation in this regard shall be given to the Registrar before the genetic purity test is conducted by the concerned institute [Notification of plant species and its DUS test guidelines shall not be compulsory for certification of farmers' variety (traditional varieties, wild relatives, landraces and varieties about which farmers possess the common knowledge) as per section 29(2) of PPV&FR Act, 2001 for facilitation of certification of Farmers' variety for registration by SAUs or CAUs, ICAR or CSIR or Institutions of Central Government/ State Government/ UT dealing with plant varietal development.

After the genetic purity test is conducted required quantity of seeds (half of the quantity as specified in the respective DUS test guidelines of respective crop species) be sent to the Registrar, PPV&FRA along with the original application by Farmer/Community including the endorsement on **Annexure-I** specified by the variety's botany, taxonomy and its systematic.

The above is not applicable to applications for registration of varieties by farmers as plant breeders as provided under Section 39 (1)(i) which shall be treated as any other variety by any other plant breeder from public or private sector for plant variety that is not covered under the definition of the farmers variety under Section 2(I).

After receiving original application by Farmer/Community including the endorsement on **Annexure-I** start following steps for registration of varieties.
